

Uniform, Semi-Automatic Carton Forming and Filling Station

STA-PP50

S E R I E S

- Simple, easy set-up
- Engineered for 24 hour operation
- All pneumatic, no electric
- Guide system for easy loading
- Pneumatic ram discharge system to eject box into taping machine
- Wide box range
- Change over quickly from one box size to another
- Integrates with sealing machine

APPLICATION

The STA-PP50 Series is a carton forming machine that automatically prepares the boxes with the four bottom flaps folded in position. In seconds, the carton is ready for the operator to fill, allowing use of both hands for placing the product into the carton. After the carton is filled, the operator presses a button and the STA-PP50 Series automatically transfers the carton into a uniform case sealer for top and bottom sealing.

For larger cartons, the STA-PP65 model performs the same process. Additionally, the STA-PP50 Series can be linked with carton sealing machines by motorized conveyors.

EXCLUSIVE STA TAPE HEAD

Optional packaging modules with taping devices are available as add-ons to the STA-PP50 packing station. The patented STA taping head design is uniquely engineered to maintain consistent pressure to the tape to ensure the most secure, reliable seal possible. Our new line of interchangeable pressure sensitive taping heads is offered in a variety of tab lengths and tape widths to fit your application.

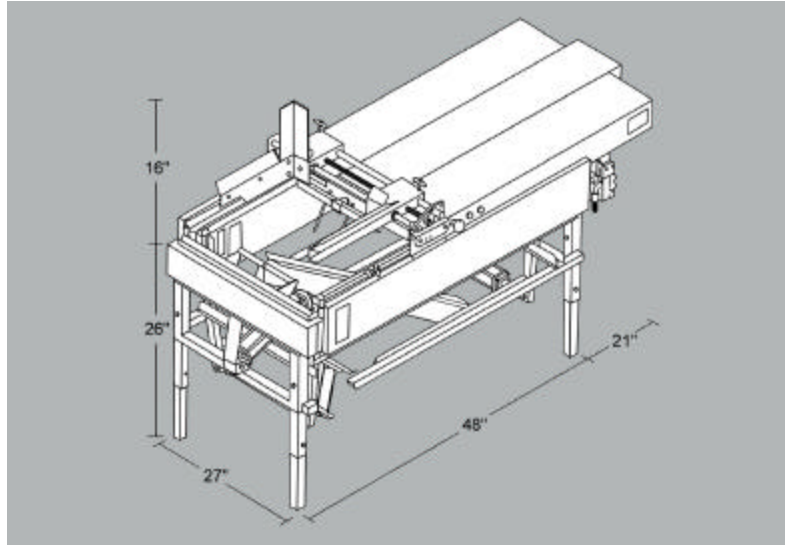

For the best results, rely on STA Proven Performance acrylic tapes, for use with your high-throughput sealing machines. Together, you have the most reliable single source tape sealing system.
