

Uniform Automatic, Top and Bottom Case Sealer

STA-F50

S E R I E S

- Engineered for 24 hour operation
- Unique four flap closing system
- Simple, reliable side drive belt system
- Six tape head variations
- Fast, easy set-up and adjustments

APPLICATION

The STA-F50 Series are automatic top and bottom case sealers for taping uniform cases. No operator is required, because the top flaps of the case are automatically folded with the unique four flaps closing system, and fed into the machine for top and bottom taping. Overstuffed packages are adjusted to automatically by the four post top head support system. And change over from one case size to the next is quick and easy.

For wider, taller cases, the STA-F65 models offer you the same automation. An exceptional value, these machines combine the economy of an operatorless design with consistent, quality output.

EXCLUSIVE STA TAPE HEAD

The patented STA taping head design is uniquely engineered to maintain consistent pressure to the tape to ensure the most secure, reliable seal possible. Our new line of interchangeable pressure sensitive taping heads are offered in a variety of tab lengths and tape widths to fit your application.

For the best results, rely on STA Proven Performance acrylic tapes, for use with your high-throughput automatic sealing machines. Together, you have the most reliable single source tape sealing system.
